EDUCATION

Jaypee Institute of Information Technology
B.Tech (CSE)

2021 – 2025

Noida, India

CERTIFICATIONS

- Claude Certified Architect
- SnowPro® Specialty: Gen AI
- Claude Certified Developer
- SnowPro® Core Certification
- SnowPro® Advanced: Data Scientist

EXPERIENCE

BOT - GCC - Hakkoda An IBM Company

2025 – 2026

AI Engineer (Forward Deployed Engineer)

- **Architected an autonomous Generative AI solution using Snowflake Cortex AI** for multi-parameter data validation; engineered agentic workflows and API integrations to dynamically generate multi-sheet Excel TUT reports, reducing a 3-4 hour manual task to 1 minute and **saving 800 hours across 8 sprints**.
- **Developed an LLM-powered multi-agent framework using LangChain** for automated code generation and remediation of **500+ dbt models**; integrated GitHub APIs to automate CI/CD testing, **saving 500 manual hours** and streamlining enterprise DataOps workflows.
- **Engineered a scalable Retrieval-Augmented Generation (RAG) system** leveraging **Azure Functions** and webhooks for continuous code synchronization; optimized text chunking and context retrieval to ensure a highly accurate knowledge base for reliable AI query responses.
- **Built an AI-driven Streamlit (Python) application** utilizing custom prompt engineering and intelligent agents to parse and translate complex Tableau Custom SQL; enabled parallel data extraction and persisted consolidated metadata into a **PostgreSQL** database.
- **Designed an intelligent migration framework** to transition legacy SaaS workflows into **dbt and Apache Airflow pipelines**, embedding an AI-driven validation agent loop to ensure data transformation accuracy and strict quality assurance.
- **Created a specialized LLM-powered lineage discovery tool** applying Natural Language Processing (NLP) to parse compiled SQL; automatically mapped end-to-end column dependencies, eliminating manual analysis and accelerating downstream impact assessment.
- **Spearheaded a secure cloud infrastructure migration** to IBM platforms by identifying and remediating **100+ security vulnerabilities** across application, dependency, and configuration layers, ensuring strict compliance for enterprise AI deployments.

PROJECTS

CodePilot – Autonomous AI Agent | Python, Flask, Playwright, LLMs, VS Code API

- **Engineered an agentic AI coding assistant** (VS Code extension) powered by LLMs and a **Flask REST API**; integrated **Playwright** browser automation to orchestrate an 8-tool calling system (file operations, shell execution, semantic search) via **JSON parsing**, enabling multi-step reasoning and human-in-the-loop validation for safe, iterative code generation.

Real-Time Human Counter | OpenCV, VGG-16, CNNs, Deep Learning

- **Developed a robust Deep Learning and Computer Vision pipeline** utilizing **OpenCV** and a **VGG-16 Convolutional Neural Network (CNN)** for real-time object detection; implemented centroid tracking algorithms to process live video streams and deliver highly accurate automated crowd counting and video analytics.

TECHNICAL SKILLS

Languages: Python, C++

Developer Tools: VS Code, Android Studio, Jupyter

Technologies/Frameworks: Streamlit, LangChain, LangGraph, RAG, Knowledge Graph, Linux, GitHub, TensorFlow, Docker, CI/CD, Snowflake, dbt, PostgreSQL, Azure, Sigma BI, n8n
